- Include Uppercase Letters (A-Z)
- Include Lowercase Letters (a-z)
- Include Numbers (0-9)
- Include Symbols (@-\$_)
- Exclude Duplicate Characters

GENERATE PASSWORD

To customize password **length** (Top red arrow):

-Move slider left or right to desired length

To customize password with **options** (Bottom red arrow)

- Select options to add to custom generated password

The image shows a web interface for a "Random Password Generator". At the top, there is a button labeled "Generate new password" with a copy icon to its right. Below this is a horizontal slider for password length, currently set to 26, with a red arrow pointing to the value. Underneath the slider are five checkboxes for password options: "Include Uppercase Letters (A-Z)", "Include Lowercase Letters (a-z)", "Include Numbers (0-9)", "Include Symbols (@-)", and "Exclude Duplicate Characters". A second red arrow points to the "Include Numbers (0-9)" option. At the bottom of the interface is a large blue button labeled "GENERATE PASSWORD".

Test Your Passwords

Use the Password Tester to check the strength of any password.

Results include:

- Color-coded feedback based on strength.
- Warnings if your password is easy to crack or appears in data breaches.

Our password strength is based on this chart:
